Marshall Bromley 150, Black & Brass

257530

Bromley 150 is our most portable party speaker, made to bring big powerful sound anywhere. We built the compact cabinet with an integrated control panel and added a grab-and-go handle for maximum flexibility, no matter the conditions. With all-day-and-night playtime, lights that feel like a live show, and mic and instrument inputs, it can turn any remote location into a venue. When you want to throw a party in no time, Bromley 150 always delivers.

PRODUCT DETAILS

TRUE STEREOPHONIC 360° SOUND

Marshall's exclusive True Stereophonic 360° technology is engineered to unleash the energy of live music. Speakers in the front and the back deliver powerful sound in every direction. Our patented acoustic design and processing inspired by the origins of stereo recording, preserves all depth, creating a sound that feels bigger than the speaker itself. By spreading rich mids, detailed highs, and deep bass evenly, every corner of the party becomes a sweet spot.

40+ HOURS OF PORTABLE PLAYTIME

For the parties that you never want to end, Bromley 150 delivers. Keep the music going for a whole day, throughout the night and then some, on just one charge. There's no need to stay close to home. Should you run out of power, keep an extra battery at hand. It's small enough to easily bring with you and switch out to keep the crowd on their feet.

INTEGRATED STAGE LIGHTS

Bring your music to life with the energy of a live show. Taking direct inspiration from live gigs, these lights turn your speaker into part of the performance. The placement and movement of the lights are designed to mirror the lighting rigs used at live performances, creating the same sense of depth, energy, and atmosphere you feel in a venue. Choose from three presets to shift the mood, from subtle ambience to full-powered light shows that move with the music.

MIC & INSTRUMENT INPUTS

Bromley 150 let's you join the set by plugging in your mic or instrument. The two inputs make it easy to surprise the party with an unexpected show, or turn it into a late-night karaoke session. Play and sing along to the soundtrack without breaking the vibe. One minute it's a playlist, the next it's a live performance. It turns the speaker into a stage, making every gathering more engaging, more spontaneous, and a lot more memorable.

DIRT & SPLASH RESISTANT

Built to go wherever the party takes you, Bromley 150 is ready for beach days, garden gatherings, and late nights in dusty basements alike. Its IP55 rating means it can take dirt and water splashes without a problem. And silicone covers shield the battery and input ports from spills and unexpected weather. No matter the conditions, Bromley 150 keeps the music going without missing a beat.

BUILT-IN HANDLE

We added the handle on the top of the speaker so that you can easily grab it and go. Whether you're moving it around your home, or if you're off to a remote party location, it's light weight, compact size and built-in handle keeps it hassle-free. Our team also designed the handle to slip into the cabinet when pressed down, letting you stack several speakers on top of each other.

Included in the package

- Bromley 150
- Battery
- Quick start guide
- Legal and safety information
- Power supply cable
