Pioneer DJ XDJ-RR All-in-one 2-channel DJ system

PRODUCT DETAILS

Play your own way

The XDJ-RR lets you choose how you'd like to perform. You can plug in your USB drive and play tracks directly, use Link Export mode to access your entire rekordbox library via your laptop without needing to export your music to a USB drive, or, if you'd prefer, you can connect your PC/Mac with a single USB cable to harness Performance mode in rekordbox dj. It's all up to you.

Large colour screen

See what's happening on both players simultaneously via the 7-inch colour screen. Keep an eye on the playback status, BPM, waveform, and other information vital to performing creative, smooth sets.

Performance controls

Enhance your mixes using dedicated buttons for performance features. Remix tracks live by triggering Hot Cues in fresh sequences, chop loops on the fly with Beat Loop, use Slip Loop to re-introduce tracks in the perfect place, and bounce to the bar of your choice with Beat Jump.

Mixer with Pro features

Deliver fine-tuned mixes with the help of EQs and channel faders which feature the same curves as those on our professional club mixer, the DJM-900NXS2. You can also customise your routines with the popular Beat FX - Echo, Reverb and Flanger - and dial up the texture and tension with Sound Color FX - Filter, Noise, Dub Echo and Pitch.

Rekordbox DJ

The XDJ-RR comes bundled with our professional performance application, rekordbox dj, so you can simply activate your licence key and power up to start DJing straight out of the box. Unlock even more features by combining the XDJ-RR with our DDJ-XP1 sub controller (available separately) and the crowd won't know what hit them.
