PRODUCT DETAILS

Industry-defining security

battle-tested by the Donjon's white hat hackers, protected by the Secure Element, and powered by Ledger OS.

Connect effortlessly with Ledger Wallet

pair your secure Ledger signer with the all in one Ledger Wallet crypto app to manage thousands of digital assets across multiple devices and accounts with Ledger Sync from a single, secure dashboard.

Digital asset control at your fingertips

manage 15,000+ crypto across multiple chains. Earn rewards. Top up & share with ease. Explore DeFi with confidence. Collect and showcase NFTs. Make informed choices with clarity.

Playful, user-friendly design

monitor the market, compare rates and Clear Sign all transactions on the secure 2.8" anti-glare, scratch-resistant touchscreen.

This is what security feels like

Ledger touchscreen signers all come with a private, offline, PIN-protected backup, Ledger Recovery Key, to never lose access to your assets.

More than just crypto

More than just crypto: confirm your device is authentic with Genuine Check, manage all your logins with Ledger Security Key, detect common scams with Transaction Check and more.
