PRODUCT DETAILS

Personalized watch faces with fun animated wallpapers

myFirst Fone S3 comes equipped with a collection of lively animated wallpapers, and you can also customize your watch face with your own selfies or photos sent from friends in the chat room.

Heart Rate Monitoring & Heart Rate Alert

Fone S3 features PPG Heart Rate Monitoring, so parents can set high heart rate alerts remotely via the app. If your child is running and their heart rate exceeds the set limit, the watch will automatically detect it and issue an alert to slow down.

Chat with parents and friends using emojis and multiple preset texts

You can scroll to the right and choose from a list of handy and common phrases that the kids like, kids can now have a speedy reply without using the voice message.

Fitness goal achievement with badges

The activity tracker shows your achievement and encourages the young one to achieve their daily target. Rewards with unique badges. Be active and have fun~

Enhanced water resistance with IPX8 rating

myFirst Fone S3 has been upgraded to an IPX8 water resistance rating, offering stronger and longer-lasting protection against water. The watch has been tested in a laboratory and certified to withstand 2 meter of water for up to an hour.

1.4 inch screen

S3 features a vibrant and clear 1.4 inch IPS screen. This display technology provides a sharp and colorful viewing experience, making it easier for kids to read, navigate, and interact with their smartwatch.

4G LTE

It's the best time for all the kids to enter the 4G world. With 4G LTE, myFirst Fone S3 empowers your

kids with the freedom of cellular. Experience faster and smoother performance for all of their favourite fitness, health and productivity features on this smart watch for kids.

Precise location

Getting lost has never been this fun! S3 uses advanced GPS, WiFi and GSM to help parents accurately and conveniently track their kids.

One-Touch SOS

Send distress signals through an integrated SOS button. Once activated, parents will receive an emergency location alert with a 30s live recording of surrounding sounds.

1500 Songs on your wrist

S3 comes with an MP3 player and built-in loudspeaker that provides up to 10 hours playback time which is great for music or listening to audiobooks. Feel the joy of having 1500 songs on your wrist!

Real-time communication

Get live updates from those closest to you. Using cellular networks, both the S3 and smartphone can converse in real-time through either voice or video calls.

Geo-fencing

Keep your child within 200m from the boundaries of your holiday home. Preset safety zones for your kids by highlighting geo-locations in the iOS or Android app.

Class Mode

With flexible customization on class mode, S3 can be silenced at a specified day or time to minimize distractions. All calls and message alerts will be silent upon activation and only SOS function can be used. A great feature to let kids stay focused on their school work or study.
