MomCozy M5 Breast Pump, Double

254217

The Momcozy M5 portable breastpump was designed to enable breastfeeding mothers to express milk comfortably and painlessly – anytime, anywhere. The 105° flange angle mimics the baby's natural sucking position and promotes effective milk flow without pain. With its ergonomic design and double-sealed flange, the M5 offers optimal fit and comfort. Three massage points release blocked milk ducts and make pumping more comfortable. Thanks to 6 customisable intensity levels, the pumping process can be individually controlled. The compact, lightweight design and hands-free operation make the M5 the ideal companion for active mothers – flexible, efficient and convenient.

PRODUCT DETAILS

Size

SINGLE, **DOUBLE**

Optimized angle for pain-free pumping

The precise flange angle of 105° ensures a comfortable pumping experience and effectively promotes milk delivery without any pain.

Seamless comfort through ergonomic design

The double-sealed flange and ergonomic 105° chest adjustment provide a perfect fit that gently hugs your body.

Massage points for optimal relief

Three targeted massage points help to relieve clogged milk ducts and ensure a smooth pumping process - for more comfort and efficiency.

Fully Customizable Settings

Customize your pumping session with 9 adjustable levels, 3 modes, and 6 intensities per mode for total control over your pumping experience.

Innovative Micro-Vibration Technology

The M5 is equipped with micro-vibration technology to promote milk secretion during breastfeeding and ensure efficient milk flow.

Tailor-made fit for every mother

Choose from 5 sizes (17/19/21/24/27 mm) to find the perfect fit for your body and guarantee supreme comfort.

Safety for you and your baby

Made of BPA-free, food-grade silicone, our breast pump is safe and safe for you and your baby.

Quiet operation for discreet pumping

With a noise level of less than 50 dB, you can pump discreetly anytime, anywhere – ideal for at home or on the go.

Powerful suction power for effective results

Benefit from a suction power of 112-270(\pm 5)mmHg for fast and efficient milk dispensing.

Fast charging and long service life

Charged in just 2 hours, the pump allows up to 120 minutes of use – ideal for 3-4 pumps.
