

SJÖSTRAND
COFFEE CONCEPT

French Press

250727

Sjöstrand's French Press enables you to manually brew coffee for an intense taste experience. The French Press is crafted from stainless steel with a timeless mirror finish so it looks good in any setting. It features a double wall that maintains optimal temperature along with a press that provides unparalleled filtration. The plunger can also be taken apart, making it easy to clean.

PRODUCT DETAILS

Technical specifications:

Manual coffee-brewing for a rich flavour

Stainless steel with a high-gloss mirror finish in a timeless design

Pot with a stainless steel double wall that isolates and preserves the temperature

Stainless steel filter plunger for optimal filtering

The plunger can easily be disassembled for simple, hygienic cleaning

Sjöstrand French Press size: 800 ml/27 oz (approx. 3 bigger coffee cups)

For the best results possible, follow the simple instructions below:

Put coarsely ground coffee beans into the pot.

Add one rounded tablespoon of coffee for every 1.25dl/4 oz of water, or adjust amounts to increase strength.

Boil water separately and let it cool until the temperature falls to 92-96° – the optimal brewing temperature for coffee.

Pour in half the water and stir lightly before pouring in the rest of the water.

Put the lid back on and let the coffee brew for 4 minutes.

After 4 minutes, slowly press down the plunger and let stand for about a minute for a fuller, richer flavour.

Serve up your delicious french press coffee to family and friends or enjoy a cup and a little break for yourself.
