

Blueair Pro Particle Filter

249266

Compatible with Pro M, Pro L & Pro XL

PRODUCT DETAILS

Professional particle removal
Particle filters minimize allergy triggers, viruses, and bacteria for a healthier workplace environment with high filtration efficiency. Together with HEPASilent™ filtration technology, our particle filters remove 99.97% of airborne particles down to 0.1 microns, including pollutants such as pollen, dust, pet dander, mold spores, viruses, bacteria, fine smoke particles and more.

Genuine performance, superior quality
Unlike generic look-a-likes, genuine Blueair replacement filters are specifically designed to maintain superior performance over time and ensures your warranty remains intact.

Replacement is easy
When it's time to replace your filter (about every six months), start by unplugging your air purifier. Remove the air intake grate on the right-hand side to access the filter. Pull the tabs on either side of the used filter together to close it like a book and remove it. Insert a new filter, opening it like a book inside in the air purifier - the sides should snap into place. Replace the air intake grate and plug back in. Easy.

Specifications

- Filter Type: Thermally bonded polyolefin fibers free of chemicals and binders. Fiber shedding resistant.
- Dimensions(HxWxD): 349 x 205 x 64 mm
- Product weight: 0.4kg
- Filter frame material: PP
- Filter recycling: Yes, please check your local recycling facility for availability.
- Recommended filter change:6 months (4,380 hours)
- Number of filters: 1
