Mill Glass WiFi Panel Heater 400W, White

251985

Mill Glass WiFi PanelHeater 400W is a glass panel heater with an integrated WiFi module. Keeps rooms up to 6m² heated. It has an output of 400 watts.

PRODUCT DETAILS

With Mill WiFi heaters, you can easily control your heaters from your smartphone ensuring comfortable temperatures at any time without wasting electricity. Mill Glass is Norway's best-selling glass panel heater, and we think we know the secret behind its success: the simple, yet oh so elegant design. The panel heater has an exclusive, contemporary glass front that fits perfectly into any modern home. Additionally, the stylish panel heater provides a comfortable ambient temperature and can be safely used without supervision. Imagine the joy of always coming home to a lush, warm house...

In the Mill App, you can program the temperature to automatically adjust to your daily routines, which ensures everyday comfort and saves both your wallet and the environment from unnecessary expenses and electricity usage. By using the app, you can control several houses and as many heaters as you like, no matter where you are in the world. As a result, you will always come home to a cozy, comfortably warm house or cottage. Doesn't that sound amazing?

Features

- First panel heater with PID control heating technology. When desired temperature is reached, the heater will maintain this temperature by lowering the power level, resulting in a more stable heating with less fluctuation in temperature.
- Predictive heating – the panel heater will heat the room so that the desired temperature is reached at a specific time. The heater learns how fast/slow the room goes up/down in temperature over time. That way, it will know when to start heating to achieve your desired temperature at the time you have scheduled in the app.
- Seamless and easy connection with Bluetooth that automatically connects the device to your WiFi-network, regardless of the type of router you have
- Silent operation due to silicon control – no clicking sound when the temperature goes up and down.
- Child safety lock – for safe usage
- Commercial lock for landlords
- Open window function that switches off the heater automatically when a window is opened
- Possibility to let Mill Sense override the heater's temperature sensor – allowing more precise temperature control
- OTA (Over the Air) updates allowing new exciting features to be added to the software

Other features

- Power: 400W
- Recommended room size: 4-6 m²
- Aluminium heating element – high efficiency and low surface temperature
- Silent operation
- 10 heat settings. Adjust the wattage to your needs
- Super accurate thermostat – digitally registered
- Temperature calibration function
- Advanced thermostat control – Mill App + WiFi
- Material front: Glass
- Cord: White, 130 cm
- Placement cord outlet: Right side
- Grounded connection: Yes
- IP classification: IPX4 (Approved for use in bathrooms zone 2)
- Product size (W x D x H cm): 50,7 x 38,4 x 7,8 cm
- Model name: GL400WIFI3
