Mill WiFi convection heater 1200W

251970

With Mill WiFi heaters, you can easily control your heaters from your smartphone ensuring comfortable temperatures at any time without wasting a lot of electricity. The Mill WiFi convection heater is an astonishing eye-catcher as it floats elegantly above the floor.

Colour

PRODUCT DETAILS

This award-winning heater has soft, rounded edges and gently curved sides, and the black middle part underlines the slim, elegant design. The Mill WiFi heater is easy to control with the Mill app, no matter where you are in the world. In the app, you can conveniently program the temperature to automatically adjust to your daily routines. That way, you save the environment from unnecessary use of electricity, and you save yourself the unnecessary expense. In addition to being stunningly beautiful, this model has the same heating element you can find in all Mill panel heaters, which means it can safely operate without supervision.

Features

- Predictive heating – the panel heater will heat the room so that the desired temperature is reached at a specific time. The heater learns how fast/slow the room goes up/down in temperature over time. That way, it will know when to start heating to achieve your desired temperature at the time you have scheduled in the app.
- Seamless and easy connection with Bluetooth that automatically connects the device to your WiFi-network, regardless of the type of router you have
- Silent operation due to silicon control – no clicking sound when the temperature goes up and down.
- Child safety lock – for safe usage
- Commercial lock for landlords
- Open window function that switches off the heater automatically when a window is opened
- Possibility to let Mill Sense override the heater's temperature sensor – allowing more precise temperature control
- OTA (Over the Air) updates allowing new exciting features to be added to the software

Other features

- Aluminium heating element: high efficiency and low surface temperature
- Advanced thermostat: WiFi + App
- Temperature calibration function
- Stunning design
- Tip-over switch and overheat protection
- Power: 1200W

- Material front: Steel
- Material foot: Aluminium
- Colour: White
- Cord: Black, 160 cm
- Placement cord outlet: End
- Grounded connection: Yes
- Product size (W x D x H cm): 62,0 x 21,0 x 38,5 cm
- Model name: CO1200WIFI3
