Aiper Scuba L1 Cordless Pool cleaning robot

252969

Revolutionize your pool cleaning with Aiper's Scuba L1. Boasting a powerful tri-motor system for improved performance, it also features a premium silicone roller brush and innovative dual-stage filtration to capture the tiniest debris. Enjoy effortless operation with one-click activation and protect your pool with its anti-collision bumpers. Experience unparalleled ease and efficiency in maintaining pools up to 100 m².

PRODUCT DETAILS

Three-motor system that improves cleaning performance.

The Scuba L1 utilises a three-motor system that provides more power, greater mobility and more cleaning capabilities than other robotic pool cleaners in its class.

The floor roller brush ensures thorough pool cleaning.

The Scuba L1 combines several functions for first-class cleaning. Its premium silicone brush scrubs the pool floor and channels dirt into a sophisticated filtration system that outperforms comparable devices.

Dual filtration captures even the smallest pool debris

The industry's first two-stage filtration system designed specifically for above ground pools. In addition to cleaning debris such as leaves and twigs, the replaceable two-stage filter requires minimal cleaning.

One-click activation for easy use

Click and forget. Cleaning is now very easy - just press a button and watch it clean.

Bumper protection protects your pool and your device

As the Scuba L1 travels across the bottom of your pool, anti-collision bumpers around the device protect it and your pool from accidental damage and ensure that your pool is always in top condition.

Best pool robot for above ground pools

The Scuba L1 offers an unrivalled cleaning experience for above-ground pools up to 100 m²

What's in the box

- Scuba L1

- Charger
- User Manual
- Retrieval Hook
- 2 × Extra 3m Ultra-fine Filter
