

HERO11 Black Creator Edition

251797

The HERO11 Black Creator Edition is an all-in-one content capturing powerhouse that makes vlogging, filmmaking and live streaming easier than ever. This complete system features pro-quality 5.3K video, Emmy Award-winning HyperSmooth 5.0 video stabilisation, enhanced audio and powerful LED lighting, plus 4 hours of 4K recording time per charge.

PRODUCT DETAILS

All-in-One Creative Solution

The HERO11 Black Creator Edition combines HERO11 Black, the best GoPro camera ever made, with the mounts and accessories you need to tell your story right out of the box. It includes Volta (Battery Grip / Tripod / Remote), Media Mod and Light Mod, which seamlessly come together in a powerful creative solution that delivers stunning pro-quality footage and capture versatility in an ultra-portable design that's light enough to comfortably carry through an all-day production.

Revolutionary New Image Sensor

The HERO11 Black Creator Edition's powerful new image sensor delivers the most expansive field of view ever on a HERO camera out of the box. This gives you an extra-large canvas for your creativity by capturing more of the sky and horizon in every shot. Simply use the GoPro Quik app to zoom in, crop your shots and more while keeping the rich textures and sharpness of your footage.

Unbelievable Image Quality

With 5.3K video that gives you 91% more resolution than 4K and an incredible 665% more than 1080p, the HERO11 Black Creator Edition captures the action with crisp detail and cinematic image quality. A water-repelling lens cover helps eliminate lens flare and other artefacts to make your photos and videos even more stunning.

High-Res Photos + Videos, High Frame Rate

The HERO11 Black Creator Edition's new image sensor boosts photo resolution up to an incredible 27 MP while delivering 5.3K60 video with amazingly fluid motion. You can also grab stunning photos up to 24.7 MP of your favourite shots from your videos using the GoPro Quik app. Plus, record 2.7K240 video that can be played back in 8x slo-mo to catch details that can't be seen at normal speed.

Emmy Award-Winning HyperSmooth Stabilisation

HyperSmooth has never been better. And now it's won a huge award for its insanely smooth footage—a 2021 Emmy for In-Camera Sensor and Software Stabilisation. HyperSmooth 5.0 raises the bar even higher with Horizon Lock, improved stabilisation for 4:3 aspect ratio footage thanks to our new image sensor, and AutoBoost for maximum stabilisation with minimal image cropping. Bike, skate, ski, chase your kids through the park or get some amazing pet POV shots—even the shakiest footage comes out silky smooth.

Horizon Lock

Give your videos the look of professional productions by keeping the horizon steady, straight and smooth. The HERO11 Black Creator Edition's Linear + Horizon Lock digital lens keeps your footage steady even if your camera rotates a full 360° during capture.² Combined with HyperSmooth, Horizon Lock delivers super-smooth footage that looks perfectly straight when you want it to. You won't need a gimbal or stabilisation software for pro-quality results.

All-Day Capture + Enduro Battery

The HERO11 Black Creator Edition combines HERO11 Black's advanced Enduro battery with the power of the Volta grip to give you a total of 6,620 mAh of power. This lets you record 4 hours of 4K footage at 30 frames per second¹—enough to capture a full day of video clips. The 1,720-mAh Enduro also dramatically improves camera performance in cold temperatures so you can power through ski, snowboard and other winter shots at lower temperatures than ever.

Capture. Charge. Get a Highlight Video Automatically.³

Simply plug in your GoPro when connected to your home Wi-Fi. While it's charging, your footage is saved to the cloud and used to make highlight videos with beat-synced music and effects. Videos are automatically sent to your phone and ready to share.

Easy Transferring + Unlimited Cloud Backup³

Super easy, super fast. Transferring photos and videos from your cloud-connected camera to your phone is simple and versatile, with your choice of effortless wireless upload via the Quik app or a lightning-fast wired connection via USB.⁴ There's also unlimited cloud storage with hassle-free auto upload. Just plug in your camera when connected to your home Wi-Fi and the camera does the rest.⁴ You can also use your SD card to transfer your content to a computer for backup to the cloud.

Enhanced Audio Capture

The HERO11 Black Creator Edition's Media Mod features a standard 3.5-mm mic port that lets you plug in an external microphone for improved audio in your videos. It also has its own built-in directional mic for enhanced voice capture with reduced ambient noise. Set the mic to prioritise audio coming from in front of the camera to capture interviews and performances, or behind the camera to add your commentary to everything happening in front of you. It also includes a removable foam mic cover that suppresses wind gusts up to 32 kph.

Near Limitless Expansion

The Media Mod gives you the option of expanding your HERO11 Black Creator Edition with additional gear to help you capture your story. It features a standard 3.5-mm mic port for adding your own external mic, HDMI-out for playback on external monitors, plus two cold-shoe mounts for lights, LCD screens or other accessories.

Built-in Tripod

In addition to making it easy to hold and aim your camera, the HERO11 Black Creator Edition's Volta grip has built-in tripod legs that easily flip out any time you need to set it down to capture stationary and hands-free shots. Swivel mounting fingers even let you rotate and tilt the camera to find just the right capture angle.

Mounting Flexibility

Retractable mounting fingers make it easy to attach your HERO11 Black Creator Edition to GoPro backpack straps to capture a first-person view of your journeys. Creator Edition can also be used with other GoPro mounts and includes a 1/4-20 mount built into the grip base that gives you even more mounting options.

Front + Rear LCD Screens

Frame your shots perfectly with either the front or rear LCD screen. Use the large rear touch screen to capture the scene in front of you or turn your camera around and use the front screen for vlogging and self-capture. The front screen features smooth live preview with crisp detail, while the rear screen's snappy touch controls make it easy to swap capture modes and adjust settings on the move.

New Night Effects

The HERO11 Black Creator Edition features three new Time Lapse modes that let you get creative after dark. Star Trails uses the Earth's rotation and the stars to capture beautiful light trails across the night sky. Light Painting lets you create brilliant brush stroke effects with moving light. Vehicle Light Trails uses night-time traffic to record stunning light trail footage.

Easy or Pro Controls

HERO11 Black features two control options that let you choose from point-and-shoot simplicity or full camera control with the ability to adjust every mode and setting. The easy controls are preloaded with ultra-versatile capture settings that are great for most shots. Just frame your shot and hit the Shutter button for amazing results. The pro controls unlock preset settings that let you choose the best settings for your shot (Standard, Activity, Cinematic, Slo-Mo and more), plus the ability to fine-tune all modes, settings and features.

1-Handed Control + Remote

Integrated camera buttons on the grip give you easy one-handed control of your camera: power on and off, start and stop capture, and switching modes. You can even detach the camera from the grip and use the grip as a wireless remote to control your camera from up to 30 m away.⁵

Powerful LED Lighting

The HERO11 Black Creator Edition's Light Mod lets you brighten the action and illuminate your next adventure with wide, smooth, even light. It features four levels of brightness (up to 200 lumens), plus Overdrive and strobe modes, and also works as a handy standalone light that can be used with GoPro mounts.

Built Around the Durable + Waterproof HERO11 Black

At the core of the HERO11 Black Creator Edition is HERO11 Black—the world's most versatile camera. Used on its own, HERO11 Black gives you amazing image quality, plus the legendary toughness that can take a beating whether you're ripping through mud, snow or water (to depths of 10 m).⁶ You can also use HERO11 Black with GoPro mounts to capture unique, one-of-a-kind perspectives and a huge variety of body-, helmet- and gear-mounted shots.

Power Tools

Nail shots the easy way with Power Tools. HindSight captures up to 30 seconds of footage before you start recording—even if you press the shutter too late, you'll still get the shot. There's also Scheduled Capture, which lets you set your GoPro to turn itself on and capture a shot up to 24 hours in advance, and Duration Capture, which makes it easy to capture video clips from 15 seconds to 3 hours long.

Webcam + Live Streaming

Use the HERO11 Black Creator Edition as an ultra-versatile webcam or live stream your next activity as you vlog with buttery HyperSmooth stabilisation and sharp resolution.

GPS Performance Stickers

Turn on this feature and get real-time animated overlays that display your speed, altitude, track position and G-forces. It's a visual way to show off your stats and give your videos a professional vibe.

Max Lens Mod

Pop on Max Lens Mod (sold separately) for the widest-ever field of view on a HERO camera, an amazing 155°, plus get unbreakable Max HyperSmooth stabilisation.

Key Camera Specs

- Video: 5.3K60, 4K120, 2.7K240 and more / looping video / 8x slo-mo / 24.7-MP frame grabs
- Photo: 27 MP / 2x zoom / single photo / night photo / 30-fps burst / RAW
- Time Lapse: 5.3K TimeWarp video / Star Trails / Light Painting / Vehicle Light Trails / 5.3K time lapse video / time lapse photo / 5.3K night lapse video / night lapse photo

Supporting Features

Video

- 5.3K, 4K, 2.7K, 1080p resolution
- 240/200, 120/100, 60/50, 30/25, 24 fps
- 16:9, 4:3, 8:7 aspect ratios
- 8x slo-mo
- HyperSmooth 5.0 with AutoBoost
- Horizon Lock / Horizon Levelling2
- 8-bit + 10-bit colour
- H.265 (HEVC) MP4 video format
- Webcam mode
- Live streaming in 1080p
- Frame grab with the GoPro Quik app

- Digital lenses
- HindSight
- QuikCapture
- Protune

Photo

- 27-MP photos
- SuperPhoto, HDR + RAW
- 30-fps Burst Photo
- Night Photo
- Digital lenses
- RAW photos
- Protune

- 5.3K TimeWarp 3.0
- Time lapse photo (27 MP) + video (5.3K)
- Star Trails, Light Painting + Vehicle Light Trails effects
- Night lapse photo (27 MP) + video (5.3K)
- Digital lenses
- Protune

Camera Control

- Large 2.27" rear touch screen with touch zoom
- 1.4" front screen for preview or status
- Easy + Pro Controls
- Presets + custom presets
- Scheduled + Duration Capture
- HiLight Tag
- Voice control with 13 commands in 11 languages + 6 accents

Content Offload

- Auto-upload to the cloud + get a highlight video automatically³
- Wireless transfer to the GoPro Quik app
- Ultra-fast wired transfer to your phone⁴
- SD card transfer to a computer

Audio Features

- Stereo + RAW audio
- 3.5-mm mic port for use with external microphone
- Three microphones with advanced wind-noise reduction
- Directional microphone with foam mic cover

Grip Features

- Built-in battery boosts runtime to 4 hours of 4K recording¹
- Fold-out tripod legs
- Built-in camera controls
- Can be used as a wireless camera remote
- 1/4-20 standard accessory mount
- Compatible with GoPro mounts

Expandability

- 3.5-mm mic port
- HDMI port
- 2 cold-shoe mounts

Lighting Features

- LED lighting up to 200 lumens
- 4 levels of brightness
- Overdrive + strobe modes

What's Included **HERO11 Black Camera**

- Carrying Case
- Enduro Battery
- Curved Adhesive Mount
- Mounting Buckle + Thumb Screw
- USB-C Cable

Volta (Battery Grip / Tripod / Remote)

- USB Pass-Through Door
- Thumb Screw
- USB-C Cable
- Lanyard

Media Mod

- Removable Windscreen
- Vertical Mounting Buckle
- Thumb Screw

Light Mod

- Light Diffuser
- 2-Finger Adaptor

Footnotes

- 1. Recording time based on recording 4K footage (average of 4 hours total) at 30 frames per second with Media Mod installed and plugged in, Bluetooth on and using the combined power of a fully charged HERO11 Black Enduro battery and Volta battery grip at 25°C. Recording times may vary with camera settings and environmental conditions.
- 2. Horizon Lock is unavailable when recording 5.3K60, 4K120, 2.7K240 and 1080p240 video. Horizon Levelling will be used for these high-performance settings.
- 3. Within your home Wi-Fi network. GoPro subscription required. GoPro subscription available in selected territories. Cancel anytime. Visit gopro.com for info and availability.
- 4. Requires standard USB-C to USB-C or standard USB-A to USB-C and Apple Lightning to USB Camera Adapter, depending on device.
- 5. Range may be affected when recording with higher resolutions and frame rates and other high-performance settings.
- 6. HERO11 Black is waterproof when used on its own with the standard side door.

Please Note

HERO11 Black Creator Edition (HERO11 Black camera when used with Volta, Media Mod and Light Mod) is not weather resistant or waterproof. Using the complete system in rain, snow or under water will damage your camera and void the warranty.
