Colour

PRODUCT DETAILS

The Hohem iSteady MT3 is an AI 3-axis gimbal for cameras and smartphones. It provides stable, smooth footage for daily content creation and professional shooting. With AI human tracking, it automatically tracks subjects, making solo shooting easy for vlogs, livestreams and short videos.

Precise AI Human Tracking

The iSteady MT3 features a built-in AI human tracking camera that detects and follows people in real time. Its 2MP AI sensor ensures smooth tracking performance, keeping your subject centered and in focus throughout the shot.

4-in-1 Multi-Device Compatibility

Supports smartphones, action cameras, compact cameras, and mirrorless cameras, allowing creators to switch between devices without changing equipment. This makes it a flexible solution for hybrid shooting scenarios and different content formats.

2nd-Gen Fast Vertical Switch

The Multi 5.0 Quick Release System supports mirrorless cameras, smartphones, and action cameras with dedicated mounts. Its upgraded quick-switch and 90° L-bracket enable fast mounting and seamless switching between horizontal and vertical shooting, including full flip-out screen support.

Ultra-Light Design for Effortless Control

Weighing only 765g, the iSteady MT3 offers a lightweight and portable design that's easy to carry and comfortable to use for long shooting sessions. It helps reduce arm fatigue while still delivering stable and reliable performance for everyday content creation.

All-Day Battery Life

The iSteady MT3 has a built-in battery capable of running the gimbal for 17 hours at a time. Recharge the gimbal using the USB-C charging port.
