## 8x10 Duochrome Film Black & Yellow

252803

The film that rewards your patience. Our large format integral film is made by hand and processed by hand. It's slightly different to the original 8x10 peel-apart film from Polaroid, but still needs the tools and technical know-how to bring it to life. The artist film that's truly a labor of love.

Style

<b>DUOCHROME BLACK & YELLOW</b>

### PRODUCT DETAILS

#### Standard Film for 8x10 Film Holders and Processors

Before Polaroid created integral instant film, they made manually processed, peel-apart film. In 1973, they introduced 8x10, a large-format film which creates photos of incredible quality. It's more complex than traditional instant film formats, but there's nothing like it, which is why it's still being made by hand today.

- 10 Instant Photos
- Format: 8.4" x 12.8" (21.4 cm x 32.5 cm)
- Silver frame
- ASA 640
- Photos develop in 5–10 mins
- Best stored refrigerated

#### Store chilled, shoot warm

Temperature affects how the film works. Keep it stored cold in the fridge, but never freeze it. Ideally you should let it adjust to room temperature before you use it. That's around 55–82°F (13–28°C). When it's cold out, keep your photos warm in a pocket close to your body while they develop. Or if it's a hot day, make sure they stay cool.

#### Shoot with the light

The more light in your shot, the better your photo will turn out. Instant film loves light, especially natural light. Use the flash for all your indoor photos. For best results we also recommend using the flash for outdoor shots, unless it's a bright sunny day.

#### Develop in the dark

All photos appear blank at first. They're most sensitive during this time, so don't bend or shake them. Shield them from the light, and place them face down as they develop. Keep B&W photos shielded from

light for about 1 minute, and color film for about 6 minutes.

Care for your camera

Your camera has a set of rollers inside the film door. Each photo passes through these rollers as it's made, so it's important to make sure that they stay clean. If the rollers get visibly dirty then gently wipe them down with a soft, damp cloth.

For use with:

- 8x10 Film Holder & Processor
