Keep your GoPro charged and extend its runtime with the Contacto Magnetic Door and Power Cable Kit. It lets you skip battery changes on the go and stay juiced during long events or time-lapse shots. Simply install the door on your camera and connect the power cable to the door, then plug into any USB-C power source.¹

PRODUCT DETAILS

Keep your GoPro charged and max out your recording time—even when you're in the middle of the action—with the Contacto Magnetic Door and Power Cable Kit. It lets you skip battery changes while you're on the road or trail and stay powered through activities, long sporting events and time-lapse shots. Simply install the door on your camera and connect the power cable to the door, then plug into any USB-C power source¹ to juice up. Your battery doesn't even have to be installed. The door is also waterproof to 10 m, so you don't have to re-install your original door when shooting under water.²

Feature Bullets

- Super-strong magnetic power cable forms a tight weatherproof seal with the door and connects to any USB-C power source¹ to charge your camera and extend its runtimes
- Makes it easy to quickly power up when it would be a challenge to change or charge batteries on the go, and keeps your camera charged at home
- Can be incorporated into a variety of mounting setups, plus comes with 0.-m and 1.2-m magnetic power cables and a USB-C Volta adapter cable for more versatility
- Door is waterproof to 10 m when installed—the same rating as your original camera door
- Helps power your camera with or without the battery installed when combined with a Contacto magnetic power cable¹

Compatibility

- HERO13 Black
- HERO12 Black
- HERO11 Black
- HERO10 Black
- HERO9 Black

What's Included

- Contacto Door
- Contacto USB-C Cable 0. m
- Contacto USB-C Cable 1.2
- Adapter Cable for Volta and USB-C

Footnotes

1. Make sure that your USB-C power source is waterproof when using in wet conditions.
2. Although the Contacto door is waterproof to 10 m, the complete kit (cables and door) is not intended for underwater use.
