

# GoPro Locking 1/4-20 Mounting Buckle

255864

Capture high-vibration action with this Locking Buckle. Its cam lock and 1/4-20 mount secure your GoPro for surfing, biking, and invisible 360° pole shots.

## PRODUCT DETAILS

The Locking 1/4-20 Mounting Buckle is a must-have for capturing high-vibration activities. It features a cam lock that uses interlocking teeth to keep your camera firmly in place and prevent it from slipping when you're surfing, mountain biking and more. An adjustable 1/4-20 mount lets you combine it with compatible GoPro mounts and accessories to create custom gear setups and ensure your camera is angled to get exactly the shots you want—including invisible 360 pole shots.

## Features

- Cam lock uses interlocking teeth to easily lock your camera in place during high vibration activities
- Adjustable 1/4-20 mount lets you create custom gear setups using compatible extensions and other accessories while positioning your camera to just the right angle
- Locking design is ideal for capturing invisible 360 pole shots using 1/4-20 extension poles without having to worry about them shaking loose and slipping during capture
- Easily attaches to any standard GoPro mounting buckle base

## Compatibility

- 1/4-20 equipped cameras and accessories
- Any mount with a standard GoPro mounting buckle base

## What's Included

- Locking 1/4-20 Mounting Buckle
