

# GoPro Magnetic Latch 1/4-20 Mount

255863

The fastest way to mount your GoPro! Magnetic alignment and a dual-latch lock let you quickly change your camera angle on any trail, slope, or water adventure.

## PRODUCT DETAILS

Attach this Magnetic Latch Mount to any 1/4-20 camera accessory to make it faster and easier than ever to swap any Magnetic Mount-compatible GoPro between mounting setups. The Magnetic Latch 1/4-20 Mount uses magnets to line up your camera so you can simply snap it in place—no thumb screw needed to mount or unmount your camera. Use it with the 1/4-20 mount on your favorite extension pole, tripod or other gear setup to quickly change your POV on the trail, slopes or water. The auto-engaging dual latch design securely locks in your camera, but only needs a pinch to release. And it's built tough, with a metal shell that protects it on the go.

## Features

- Lets you quickly and easily swap Magnetic Latch-compatible GoPro cameras between mounts without the need to touch a thumb screw
- Can be used with any 1/4-20 mount; perfect for use with extension poles and tripods
- Magnetic dual-latch design aligns your camera with the mount and helps lock it in when the camera is pressed into the adapter
- Symmetrical design allows you to attach your camera to the mount facing either direction
- 2-button pinching action immediately releases the camera
- Durable metal construction keeps the adapter rigid and secure
- Compatible with all standard 1/4-20 camera accessories

## Compatibility

- All Magnetic Latch-compatible GoPro cameras
- 1/4-20 equipped accessories

## What's Included

- Magnetic Latch 1/4-20 Mount
