

Anamorphic Lens Mod (H13)

255110

The premium HB-Series Anamorphic Lens Mod makes it easier than ever for filmmakers and content creators to tell their stories in the ultra-wide 21:9 aspect ratio used in feature films. It also captures dramatic horizontal anamorphic flares and reduces distortion and corner aberrations while in-camera “de-squeezing” streamlines editing. Simply attach the lens, and your camera will adjust its settings accordingly. The lens is durable, scratch-resistant and waterproof¹ when installed.

PRODUCT DETAILS

The premium HB-Series Anamorphic Lens Mod makes it easier than ever for filmmakers and content creators to tell their stories in the ultra-wide 21:9 aspect ratio used in feature films. It captures dramatic horizontal anamorphic flares while reducing distortion and corner aberrations to add even more cinematic artistry to your footage. In-camera “de-squeezing” lets you review your footage immediately and streamlines post-production editing. Simply attach the lens, and your camera will automatically adjust its settings accordingly so you can begin creating. Combined with the legendary durability of HERO13 Black, this waterproof lens¹ is tough enough to withstand the elements and get the shots you need.

Features

- Captures cinematic footage in an ultra-wide-angle 21:9 aspect ratio—ideal for static shots and stabilised gimbal footage of low-vibration activities²
- Horizontal lens flares with reduced distortion and corner aberrations add the artistry and professional touch of feature films to your footage
- In-camera “de-squeezing” lets you see your anamorphic footage straight after capture and streamlines editing by eliminating the need to de-squeeze footage in post-production
- Supported by HyperSmooth video stabilisation—for optimal results, use with a gimbal or other mechanical stabilisation setup
- HERO13 Black automatically recognises the lens when attached and switches into anamorphic mode; when removed, the camera returns to its standard settings
- Scratch-resistant and waterproof¹ when mounted on the camera; also has a hydrophobic lens coating that repels water
- Easy to attach, with no tools needed

What's Included

- Anamorphic Lens Mod
- Front and Rear Protective Caps

- Microfibre Lens Cloth

Compatibility

- HERO13 Black Camera

Footnotes

1. Anamorphic Lens Mod is not intended for use under water.
2. Not recommended for point-of-view (POV) action footage. Use the Ultra-Wide Lens Mod for immersive POV footage of high-vibration activities.
