

Macro Lens Mod (H13)

254275

Expand the creative possibilities of your HERO13 Black with the premium HB-Series Macro Lens Mod. A manual variable focus ring gets you 3x closer to your subject than ever before on a GoPro—from 10 cm to 0. m—while focus peaking helps you see what's in focus on the camera screen. Simply attach the lens and your camera will adjust its settings. Durable, scratch resistant and waterproof¹ when installed.

PRODUCT DETAILS

Expand the creative possibilities of your HERO13 Black with incredible up-close capture options. The premium HB-Series Macro Lens Mod gets you 3x closer to your subject than ever before on a GoPro, helping you capture slo-mo B-roll shots of muddy mountain bike spokes or a time lapse of a flower blooming. The variable focus ring lets you manually adjust the focus distance from 10 cm to 0. m, while focus peaking helps you to see what's in focus on the camera screen. Your camera detects the lens when it's attached and automatically adjusts its settings accordingly—no other setup needed. Built durable, scratch resistant, water repellent and waterproof¹ when installed, it can go just about anywhere.

Features

- Focus on objects 3x closer than ever before with a GoPro camera for artistic slo-mos and engaging time lapses
- Rotating focus ring lets you manually change the focus distance from 10 cm to 0. m
- Focus peaking information on your camera's rear screen indicates if your subject is in focus
- HERO13 Black automatically recognises the lens when attached and switches into Macro Lens mode, when removed, the camera returns to its standard settings
 - Scratch resistant and waterproof¹ when mounted on the camera, Macro Lens Mod also has a hydrophobic lens coating that repels water
 - Supported by HyperSmooth video stabilisation for buttery-smooth videos, even at close range
 - Easy to attach, with no tools needed
 - Part of the high-performance HB-Series Lens collection—exclusively for HERO13 Black
