

Boom + Adhesive Mounts

252761

Boom is a fully customizable extension rig kit that can be used with the included adhesive mounts or other compatible mounts to capture amazing new perspectives. Its premium carbon fiber arms can be used together or individually while integrated swivel points and a ball-joint camera mount let you get the exact capture angle you want.

PRODUCT DETAILS

Boom is a fully customizable extension rig kit designed to take your footage to the next level. Its premium carbon fiber arms can be used with the included adhesive mounts or other compatible mounts to capture amazing new perspectives. The arms can be used together or individually to record dramatic follow-cam and other third-person shots while surfing, skating, skiing, biking and more. Each arm features swivel points that let you twist and turn your rig to get the exact capture angle you want. This powerful creative tool also includes a ball-joint camera mount for fine-tuning your shots or totally changing things up on the fly.

Features

- Premium carbon fiber arms deliver exceptional strength and durability in a lightweight design.
- Convenient folding design makes it easy to take anywhere, pack away or adjust the extension length on the go.
- Built-in metal mounting fingers swivel 360° to let you capture the action from any angle.
- Attachable ball-joint camera mount provides full camera rotation and tilt for maximum capture flexibility.
- Included hex key lets you easily adjust the hex screws and securely lock the arms in place.
- Included triangulation support slider lets you use one arm to support the other to create ultra stable capture platforms.
- Can be combined with additional Boom extensions (sold separately) to create your own customized gear setups.
