

myFirst 3dPen Make Filaments - Wheels in Motion

255629

The Wheels in Motion myFirst Fun Pack Filaments offer a safe and creative way for kids to bring their ideas to life. This set includes 17 low-temperature PCL filaments in various colors, along with templates and a pull-back car base for endless 3D crafting fun. It's the ideal starter kit for young creators, letting them safely draw on templates and paper without the risk of high heat.

PRODUCT DETAILS

Safe & Creative 3D Fun

myFirst Fun Pack Filaments are the perfect companion for the myFirst 3dPen Make, offering a safe and creative way for kids to bring their ideas to life. Made with PCL low-temperature material, these kid-friendly filaments are specifically designed for 3D crafting directly on paper or templates, completely eliminating the risk of high heat.

Guided Projects for Growing Minds

The Fun Pack includes three themed filament sets, each featuring five unique template cards—that's a total of 15 guided projects to spark creativity and hands-on fun. These themed templates provide a structured way for children to develop spatial awareness, motor skills, and imaginative thinking as they build different shapes and characters. With myFirst Fun Pack Filaments, your child can enjoy hours of safe, educational, and creative play.
