EQ modes	Music / Music (Low Cut) / Flat / Flat (Low Cut) / Vocal / Subwoofer (Low Cut mode is intended for use on units that are combined with a WAVE-EIGHT set to Subwoofer mode.)

PRODUCT FEATURES

SonicLink ultra-low-latency wireless technology

Cable-free DJing is possible with the WAVE-EIGHT, thanks to SonicLink. This ultra-low-latency technology wirelessly transmits audio much faster than a Bluetooth connection so only a fraction of a second passes between pressing play on the decks and hearing the track through the speaker.

Switchable sound modes

The WAVE-EIGHT features several modes you can change between with a single switch to create the type of sound you need, including Mono, Stereo, and Subwoofer mode.

Combinable with the OMNIS-DUO

If you combine the WAVE-EIGHT with the OMNIS-DUO portable all-in-one DJ system, which also features battery power, you can play cable-free for total freedom.

Battery power and waterproof design

A full battery charge gives you 8 hours of music on the WAVE-EIGHT. The unit is also waterproof, with an IPX4 rating, so it's ideal for using outdoors. And there's a USB Type-C port for charging a phone or other device.

Professional sound quality

With a highly efficient Class D amplifier, a newly developed 8-inch driver, and a Vortex Bass Accelerator which delivers clear and powerful bass, the WAVE-EIGHT will bring the vibes and the punch to your party's sound, even in outdoor settings. To cover larger events and spaces, you can easily add more units to your setup with the SonicLink connection.

Easy portability

The extendable handle, casters, and additional grab handles make it easy to carry the WAVE-EIGHT to any location on your own. There's a pole socket built-in too, so you can mount the speaker on a stand for extra height.
