PRODUCT DETAILS

What Makes It Truly ULTRA

- Exclusive AI Tracker to follow various Objects
- 10m Remote Control
- AI Live FEED Monitoring
- 3-Colour Fill Light
- Built-In Extention Pole and Tripod
- Folds Fast, Travels Light
- Robust 3-Axis Stabilization
- 360 degree Infinite Pan Rotation

Multimodal AI Tracker - Leading the Way in AI Flimmaking

2 MP AI Sensor - Upgraded Accuracy

CNN-Based Deep Learning - Powered by advanced tracking algorithm, the AI tracker reacts with enhanced facial feature analysis — skillfully locking onto a fast-moving subject, even in complex scenes with multiple people, or when the target is temporarily obscured.

Millisecond Motor Response Time

Diverse Object Tracking - The industry-first brand whose AI tracker enables your native camera to track all kinds of objects — whether it's people, animals, vehicles, or other objects. No matter you use iOS, Android, or other systems, our AI tracking keeps up.

Advanced AI Tracking with Any App 360° Infinite Pan Tracking - With 360° infinite pan tracking, your movements are always in frame — perfect for capturing sweeping landscapes or automatic recording in daily life and work.

Detachable Touchscreen Remote

A new standard for gimbal — from people to animals to other objects, it's all just a tap away. It allows users to access AI tracking through various convenient methods.

1.22" Full-Color Touchscreen - Paired with an intuitive user interface, the touchscreen makes operation visible and effortless. No need to jump into an app or remember complex steps — even first-time users can get started with ease.

With a live feed on the detachable touchscreen remote, you can frame every shot to perfection — even when filming yourself with the rear camera.
10m of Freedom - The detachable controller offers up to 10m of control range, making solo content creation and group shots effortless — no extra hands needed.

One Gesture Is All It Takes - Just use simple hand gestures to start/stop AI tracking, snap photos, and record videos. You can even switch between portrait and landscape instantly, or adjust the framing with a wave.

Start AI and Stop tracking

Customized composition

*The gesture recognition range is 1.6–16.4 ft (0.5–5 m), and the AI tracking range is 1.6–23 ft (0.5–7 m).

3-Color Fill Light

Remote Lighting Control - With the controller, you can instantly turn on/off the fill light, and adjust color temperature or brightness during remote shooting, all without interrupting the moment.

Ultra-Bright Fill Light - Delivers up to 110 lux at 1.64 ft – capture every detail, even in the dark.

3-Color Temperature - Switch between cool, warm, and neutral light effortlessly, perfecting every scene.

Continuous Dimming - Enjoy smooth, flicker-free brightness control from 1% to 100%. No harsh steps or sudden drops — just seamless light that breathes with every frame.

Built-In Extension Pole

Everyone in the Frame - The built-in extension pole stretches up to 8.07 inch (205 mm) — perfect for group shots or selfies on trips. Capture it all in one frame — friends, pets, and stunning scenery.

Effortlessly simulate aerial shots, and capture baby's or pet's eye views. At live shows, it's your must-have tool for finding that unique angle.

iSteady 9.0 Algorithm - Robust 3-Axis Stabilization

Reliable Stability Through Every Move - After 11 years of refinement, iSteady 9.0 stabilization has reached new heights in servo control, algorithms and motor responsiveness, ensuring cinematic smoothness in various scenarios.

Seamless Motion Just Rock-Solid Stability - Hohem's exclusive non-linear decoupling technology enables each motor to perform its task independently, without shaking or lagging, even when the gimbal is held at a slant or moves quickly up and down.

Create Like A Pro with Hohem Joy App

Step-By-Step Inspiration - Creative Studio page in Hohem Joy app features trending scenes along with camera moves and framing tips. Turn ideas into action — with step-by-step shot inspiration.

One-Tap Cinematic Shots - Discover creative templates in Moment. Just tap "Start" — the gimbal handles the movement, turning everyday clips into cinematic shots. Such as Inception, Dolly Zoom, Hyperlapse, and Panorama.

Folds Fast, Travels Light

Compact and ultra-light — fits comfortably in one hand for effortless shooting, or slips right into your pocket when you're done.

Built-In Tripod

Stands steady for hands-free shooting.

1/4"-20 Screw Hole

Works with most tripod or extension poles.

9-Hour Battery Life

All-day battery power for continuous creation.

What's in the box?

- iSteady V3 Ultra
- AI tracker
- Touchscreen remote controller
- Type C charging cable
- Hex key
- Storage pouch
